

PROCESS EQUIPMENT AND SOLUTIONS

- Laboratory equipment

Roland Carlberg Processystem AB offers a wide range of laboratory equipment from leading international manufacturers. We offer IKA's complete range with full aftersale support. Together with our portfolio of process equipment for liquids and powder technology, Roland Carlberg Processystem AB offers a comprehensive range of equipment.

OVERHEAD STIRRERS

DISPERSERS

MILLS

BATH AND CIRCULATION THERMOSTATS

MAGNETIC STIRRERS

CENTRIFUGES

SHAKERS

DRYING OVENS

VISCOMETERS

VACUUM PUMPS

THERMOSTATS, HEATING/COOLING

ROTARY EVAPORATORS

GLASS REACTORS / TECHNICAL GLASS

HIGH PRESSURE REACTORS IN METAL

BIOREACTORS

LABREACTORS

A SELECTION OF OUR SUPPLIERS OF LABORATORY EQUIPMENT

Chemical reactors and pressure autoclaves in glass, glass-lined steel or stainless steel. For lab, pilot and production scale. Reactors with magnetic coupling for leak-free stirring. Mobile pilots 5-30 liters as well as larger chemical reactors based on the unique "Büchiflex system". Gas dosing system.

- Technical glass • Chemical reactors • Glass reactors • High pressure reactors • Nutsche filters
 - Glass overheads • Condensers • Scrubbers • Mixing vessels • Glass columns
-

Ministat and Unistat heating and cooling thermostats. Open and closed circulation bath thermostat for temperature regulation from -125 to +425°C. Enkelt handhavande med Pilot One styrpaneler. Oljebad för labb-ändamål samt större slutna termostater för pilotanläggningar/produktionsanläggningar.

- Thermostats, heating/cooling • Open or closed systems • Immersion coolers • Bath and circulation thermostats
-

We offer IKA's complete range of high-quality and innovative laboratory equipment for most applications. With stock keeping in Sweden, trained service technicians and experts only a phone call away, we want to be your preferred supplier for high-quality laboratory equipment!

Examples of lab equipment available at our webshop www.lab.rcprocess.se:

- Laboratory reactors • Magnetic stirrers • Overhead stirrers • Shakers • Hot Plates
 - Centrifuges • Dispersers (rotor-stator) • Viscometers • Rotary Evaporators • Software.
-

Automated Laboratory reactors, FlexyLab, calorimetry system for process scale up in glass or stainless steel. Complete systems with software for optimization and automated process documentation.

- Process Automation • Calorimetry
-
